Station WNTC Soon To Begin Broadcasts

Sunday, September 30, marks the official beginning of a new broadcast year for Campus Station WNTC. Many new features await WNTC listeners; and in order to offer a more comprehensive program schedule, the station will operate over 65 hours each week, Sunday-Saturday. The Station Manager is Joe Hessler, a Clarkson Senior Electrical Engineering student.

The North Country Network, in cooperation with KSLU of St. Lawrence University, has become an integral part of WNTC. Through the facilities of this network, many programs will be exchanged and an over-all increase in program standards is expected.

A complete broadcast schedule will appear later but some features are as follows:

1. A disc-jockey show at 4:30 Monday-Friday and on Saturday afternoon.
2. Complete United Press news and sports coverage.
3. Increased coverage of campus news and sports.
4. A larger variety of programs and transcribed features.

A much larger staff will be required due to the new broadcast schedule, and membership is open to students of both SUTCP and Clarkson.

WNTC operates on 640 kc and is a member of the Intercollegiate Broadcasting System.
